

How to GET MORE From Your Business Intelligence...

DIGIOP™ Intelligence Inspired

Each year, companies of every industry and size invest millions in data-capture and tracking technology designed to help deter and prevent theft, improve operational efficiencies, mitigate risk, and increase profitability. Unfortunately, the large majority of this information goes unleveraged. Why? Because these systems either don't speak to one another, or don't provide enough information to reproduce a true representation of the events that transpired.

The Solution: A Single Interface That Integrates Your Data With Video

DIGIOP ELEMENTS is a groundbreaking video and data management software (VDMS) platform that provides a single, user-friendly interface to the critical video and data intelligence that you rely on to effectively manage your business. This solution seamlessly integrates data from back-office systems with your analog or IP surveillance video cameras and empowers you to quickly locate the video relevant to captured data events.

Purpose-Built Solutions

Designed with a scalable, easy-to-manage architecture, DIGIOP's purpose-built hybrid DVR and NVR systems can meet any challenge — from a four-camera installation at a single location to an expansive global network of more than 5,000 locations. With a complete line of network and hybrid options, these systems can also utilize your existing investments in analog cameras and allow for a seamless migration path to either IP or megapixel cameras.

Seamless Integration

DIGIOP ELEMENTS is deeply integrated with all DIGIOP BLACK IP cameras and intelligent devices, and an

extensive list of other leading IP cameras and devices, including: Axis, ACTi, Arecont Vision, iQinVision, Sony, and more. DIGIOP ELEMENTS software seamlessly integrates with a wide range of third-party applications and devices, including electronic access control (EAC), point of sale (POS), people counting devices, and video analytics, to name a few.

Ease of Management

DIGIOP ELEMENTS features a web-based portal, allowing administrators to configure systems, cameras, users, and permissions across single or multisite systems. The platform also includes a remote client that allows you to view and manage your video and data from anywhere you have Internet access, and a mobile client for remote access via your smart phone.

Low Cost of Ownership, High Return on Investment

DIGIOP offers a simple licensing structure, non-expiring licenses, and no recurring fees. With DIGIOP, you only pay for what you need, and you only pay once. And this powerful combination is designed to quickly deliver return on your investment, empowering your loss prevention, operations, marketing and IT teams to fully leverage the power of your video.

Purpose-Built Solutions

Seamless Integration

Powerful Capabilities

Video-Enhanced Intelligence

Unlock the *TRUE POWER* of Your Video

Integrated Dashboard

- ▶ Remote video management
- ▶ POS, EAC & ATM data integration
- ▶ Data mining filter queries
- ▶ People counting metrics
- ▶ Store conversion rates

Cloud-Based Management

- ▶ Centralized configuration of systems, devices, users
- ▶ IP device auto-configure and auto-record
- ▶ Enterprise deployment fail-over protection

Why Work With Us? The Dealer Advantage

- ▶ A differentiated product portfolio
- ▶ Proven, stress-free solutions
- ▶ Limited distribution
- ▶ Protected pricing
- ▶ Unparalleled program benefits

Purpose-Built Solutions

DIGIOP ELEMENTS™ is available as software-only or as purpose-built hybrid DVR and NVR solutions.
